EXPERIENCE

Full Stack Developer & Data Engineer

Iconsulting S.p.A.

📅 Nov 2021 – Ongoing

📍 Bologna, Italy

- Design and develop full-stack web applications using FastAPI, Python, SQL, and Angular for analyzing and classifying sales of manufacturing products based on historical data, enabling data-driven decision-making. Deployed the web application with a CI/CD on AWS Elastic Beanstalk, ensuring secure and scalable hosting.
- Develop a middleware system for seamless communication and data synchronization between two systems, utilizing AWS SQS for message queuing, AWS Lambda functions for event-driven computation, and AWS DynamoDB for storing and enriching data based on the middle-ware's information. Used Terraform for provisioning and managing the AWS infrastructure as code, ensuring consistent and reproducible deployments.
- Implement efficient data integration and data engineering solutions with ETL workflows using Talend Data Studio, Talend Cloud, and Talend Data Stewardship, ensuring seamless merging, cleaning, and reconciliation of manufacturing data from various sources to improve data quality.

Internship

Engineering Ingegneria Informatica S.p.A

📅 April 2017 – Sept 2017

📍 Napoli, Italy

Develop Smartroad, a web application using Angular as client-side and Spring as server-side frameworks, which calculates incidental-ity indices before and after a maintenance work on a road section.

EDUCATION

M.Sc. in Artificial Intelligence

Alma Mater Studiorum – Università di Bologna

📅 Oct 2019 – Oct 2021

Thesis title: A Neurosymbolic Framework for Markov Logic Net-works

Mark: 110/110 cum laude

Artificial Intelligence: Algorithms and Applications

Nankai University, China

📅 July 2021

Online Summer School Program focused on Machine Vision and Medical Robotics

B.Sc. in Computer Engineering

Università degli Studi di Salerno

📅 Sept 2014 – Sept 2017

Thesis title: Sviluppo di una Web Application per il calcolo degli indici di incidentalità di tratte stradali

Mark: 110/110 cum laude

High School Diploma

Liceo Scientifico Federico Quercia, Mar-
cianise (CE)

📅 Sept 2009 – July 2014

Mark: 100/100

CERTIFICATIONS

AWS Certified Developer - Associate

PROJECTS

I realized several projects during my uni-
versity career or free time available on my
Github. Among them:

- PyTorch implementation of a neurosymbolic framework that integrates neural networks with Markov Logic Networks.
- A NetLogo implementation of the SEIQR epi-
demiological model for studying the evolution
of the COVID-19 epidemic.
- An object detection systems to identify single
and multiple instances of products in given
scene images.
- Text mining analysis on clickbait titles, aiming
to identify the causes and patterns that make a
title a clickbait.
- Solving the Perfect Weighted Packing (PWP)
problem, which involves packing a set of rect-
angles into a strip without overlapping.

PERSONAL SKILLS

Team work, perseverance, problem solving,
communication, critical thinking

TECHNICAL SKILLS

Languages: Python JavaScript R
C Java C# Scala Prolog SQL
HTML PHP CSS \LaTeX

Artificial Intelligence: Pytorch Tensorflow

Web Development: FastAPI Angular

React .NET

Cloud Computing: AWS Services Terraform

LANGUAGES

Italian - Mother tongue

English - IELTS 7.0 (C1)
